

- **RULES FOR THE 2007 EAU CLAIRE KUBB TOURNAMENT** -

- The official world championship rules apply.
- Throwing against the king is done from the baseline and only by the team, which has put down all fieldkubbs and the opponents basekubbs.
- There is no stacking of kubbs. Kubbs will be raised where they rest.
- All kubb throwing is done from the baseline. When throwing pins/kubbs, both feet have to be inside the sideline
- The playing field is 8x5 meters in the open division. The Beginners Division will be 7 by approx. 4.5 meters.
- The matches are played best of three.
- All members playing have to throw throwing pins. If there are four or five players on a team, the team needs to rotate who throws the extra pins. No player(s) can take the extra throws in every round.
- Any team member can throw kubbs – all by one is allowed.
- Only underarm throwing of pins and kubbs is allowed.
- All attempts to throw the pins at a 0 degree and 180 degree line of flight must be made. A slight “off center” is allowed. Intentional helicopter throwing of pins leads to the team having to throw with one pin less for the rest of the match.
- A kubb that has been put down and rises again counts as fallen.
- In the throwing of the fieldkubbs, all kubbs are thrown first, then the kubbs that have stopped invalid are re-tossed. If some kubbs still are invalid they will be “punishment kubbs”. They will be placed by the opposing team in the field. This makes it possible to push kubbs both in and out.
- “Punishment kubbs” cannot be raised closer to the king or the corner stakes than the length of a throwing pin.
- Team members coming late or coming and leaving is allowed. All must be registered/sign waiver prior to player’s first game. At least two players must be playing at all times.
- In disagreements of rules or where a kubb is sitting and an agreement cannot be made, Eric is called to the pitch.

FAIR PLAY AND LIMIT SLOW PLAY.
